BLACK BOX™

RULES AND SOLITAIRE GAMES

For 1 or 2 Players / Ages 10 to Adult

THE ULTIMATE GAME OF HIDE AND SEEK

Black Box™ is Parker Brothers, Beverly, Mass. 01915, U.S.A. trademark for its Hide and Seek Game Equipment.
Parker Brothers, P.O. Box 600, Concord, Ontario L4K 1B7 authorized user.

Downloaded from www.Manualslib.com manuals search engine

EQUIPMENT

In the box you'll find 5 balls, 48 markers, 1 pattern/score card and a crayon. Not included, but needed to erase the pattern card, is a tissue or piece of soft cloth.

A STRATEGY GAME

This is a strategy game for either 1 or 2 players. Whether you play alone or against an opponent, the game play is the same. First let's look at the 2-player version; this version presents the basic information that's also needed for solitaire play.

HIDE AND SEEK

This is a game of Hide and Seek. One player hides something; the other player looks for it. The hiding is done on the pattern card; the seeking is done in the box.

Place the pattern card next to the box. You'll see that both are exactly the same design. Both show numbers from 1 to 32 on the outside.

Decide between you who will hide and who will seek.

Hider. Without showing your opponent what you're doing, make four marks on the pattern card. You may make these marks in any four of the squares. Figure 1 shows an example.

Seeker. Your task is to find each hidden location inside the box. You try to do this in as few tries as possible.

During a real game you would not see the pattern card until you finished your search. Now, however, take a look at the card. Place it next to the box. Then place a ball into the box to **match** each mark on the card.

(1) You've just done the hiding. Each mark represents a hidden location inside the box itself.

Downloaded from www.Manualslib.com manuals search engine

This is the object of the game: to find each hidden location and mark it with a ball. After you've done this, you and your opponent then change sides: you do the hiding; your opponent does the seeking. The one to find each other's hidden locations in the fewer tries is the winner.

How do you find the hidden locations? This is where the fun and the challenge come in. In seeking the hidden locations, you're like a detective looking for clues. Your tool: imaginary rays.

THE RAYS

By sending rays into the box you — the **seeker** — gain clues about the hidden locations.

To send a ray into the box, simply announce a number from 1 to 32. Once it enters the box, the ray does one of three things:

a) it stays inside the box;
b) it comes out exactly where it entered; or
c) it comes out somewhere else.

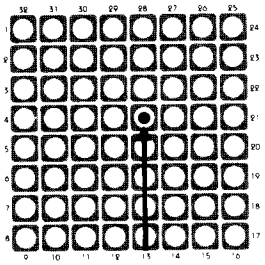
Your opponent is able to observe the ray's movement with the pattern card and tells you exactly what happens to the ray.

Here's what the rays look like and what kinds of clues they offer.

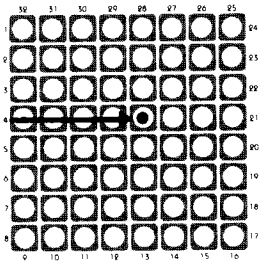
THE MOVEMENT OF RAYS/ HIT, DETOUR, REFLECTION AND MISS

Place a ball into the box to match the hidden location in Figure 2.

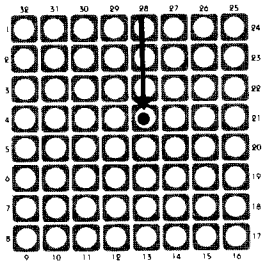
HIT: If a ray travels directly into a hidden location, it does not leave the box. Figures 2, 3, 4 and 5 show one HIT each. Trace each patch in the box with your finger.



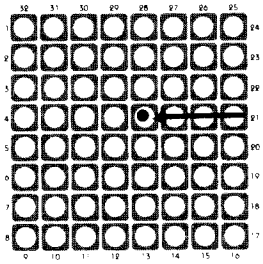
(2) Seeker says 13.
Hider says HIT.



(3) Seeker says 4.
Hider says HIT.



(4) Seeker says 28.
Hider says HIT.



(5) Seeker says 21.
Hider says HIT.

Downloaded from www.Manualslib.com manuals search engine

DETOUR: A ray cannot travel past a hidden location that lies directly next to its path. Instead, the ray detours 90° away from the **nearest** corner of the hidden location's square. If the ray approaches from the left, it detours to the left; if it approaches from the right, it detours to the right.

Figures 6, 7, 8 and 9 show one DETOUR each. Trace each path in the box with your finger. While you're doing this, notice that a DETOUR takes place at the **nearest corner** of a hidden location's square.

Place another ball into the box to match the new hidden location in Figure 10.

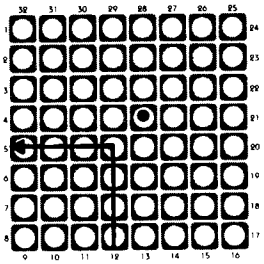
REFLECTION: If a ray leaves the box at the same point from which it entered, a REFLECTION has taken place.

A REFLECTION can take place in either of two ways:

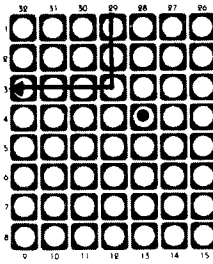
a) Look at Figure 10. The ray that enters at 14 also exits at 14. Why? Because the two DETOURS cancel each other out, forcing the ray to travel back along its path.

To better understand this effect, look at Figures 11 and 12. Figure 11 shows the DETOUR that would take place if "B" were not a hidden location. Figure 12 shows the DETOUR that would take place if "A" were not a hidden location.

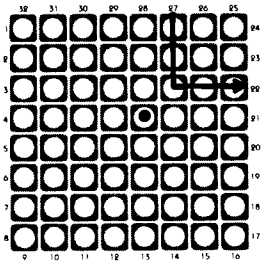
Now look at Figure 10 again and you'll see why the two DETOURS have cancelled each other out, forcing the ray to travel backwards as a REFLECTION. Study this effect using the balls in the box.



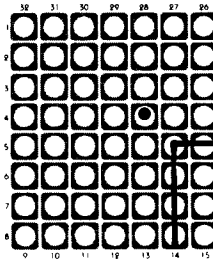
(6) Seeker says 12.
Hider says 5.



(7) Seeker says 29.
Hider says 3.



(8) Seeker says 27.
Hider says 22.



(9) Seeker says 14.

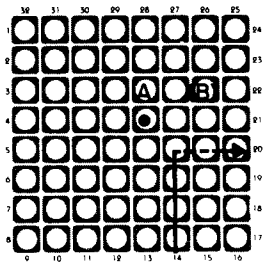
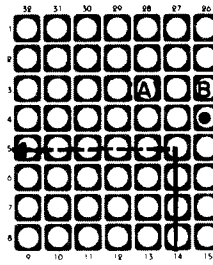
(10) Seeker says 14.
Hider says REFLECTION.



(11)

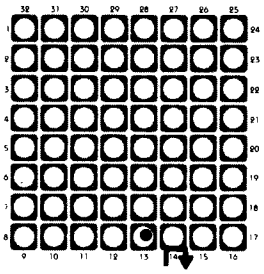


(12)

Downloaded from www.Manualslib.com manuals search engine

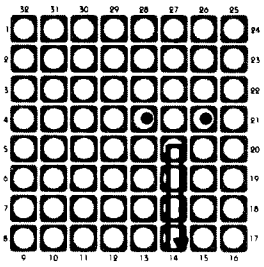
Place a ball into the box to match the hidden location in Figure 13.

b) The ray that tries to enter the box at 14 cannot travel past the **nearest corner** of the hidden location. As a result, it is forced to remain at its starting point. This is a REFLECTION, too.

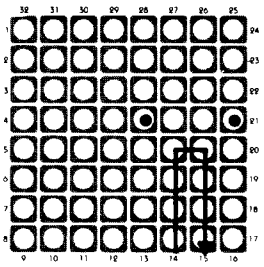


(13) Seeker says 14.
Hider says REFLECTION.

For Figures 14-17 place balls into the box to match each illustration's hidden locations.



(14) REFLECTION
Seeker says 14.
Hider says REFLECTION.



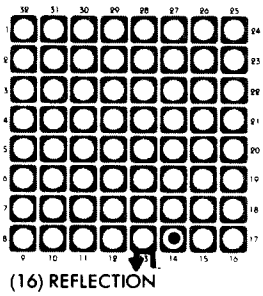
(15) DETOUR
Seeker says 14.
Hider says 15.

Figures 14 and 16 show one **REFLECTION** each. Figures 15 and 17 show one **DETOUR** each. **Study the differences carefully by tracing each path in the box with your finger.**

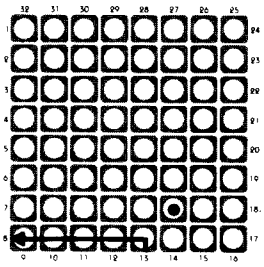
Place a ball into the box to match the hidden location in Figure 18.

MISS: If a ray does not encounter a hidden location, it travels through the box in a straight line.

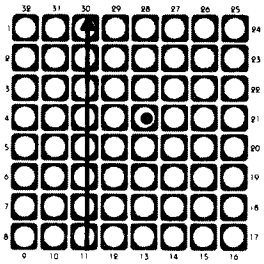
Figures 18, 19, 20 and 21 show one MISS each. Trace each ray's path in the box **with your finger**. While you're doing this, notice that there is one clear path between each ray and the hidden location.



(16) REFLECTION
Seeker says 13.
Hider says REFLECTION.



(17) DETOUR
Seeker says 13.
Hider says 8.



(18) Seeker says 11.

MARKING

To keep track of your rays, you — the **seeker** — place ray markers on the box. Take a look at the markers. You'll see that there are three kinds: red markers, yellow markers and orange markers with symbols on them. Notice that the symbols are in pairs. You use the markers in this way:

a) A HIT requires a **red marker** at the ray's entrance point.

b) A REFLECTION requires a **yellow marker** at the ray's entrance/exit point. (A yellow marker is like a mirror image of a yellow ball — an easy way to remember how to mark a REFLECTON.)

c) A DETOUR or MISS each requires **orange markers with matching symbols** at the ray's entrance and exit points.

RAY MOVEMENTS/SPECIAL EFFECTS

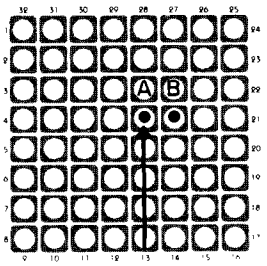
Look at Figure 22. As you can see, it shows a HIT. Why didn't hidden location "B" cause the ray to DETOUR and exit at 5? Because **a ray's basic tendency is to travel in a straight line.**

Compare this effect with that in Figure 23. This ray is forced to DETOUR because hidden location "B" is closer to the ray's entrance point; the ray cannot travel past "B's" nearest corner.

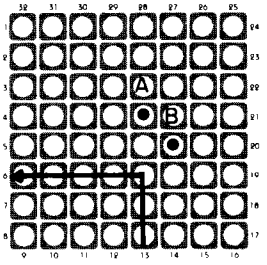
Place balls into the box to match the hidden locations in Figures 22 and 23. Trace each ray's path in the box with your finger.

Now look at Figure 24, which shows a HIT. The HIT takes place because hidden location "B" is directly in line with the ray. Compare this to the REFLECTION in Figure 25. This REFLECTION takes place because "B" is further away from the ray's entrance point.

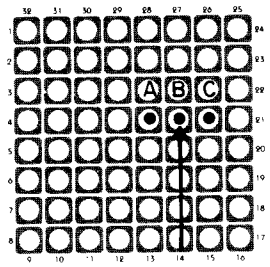
Place balls into the box to match the hidden locations in Figures 24 and 25. Trace each ray's path in the box with your finger.



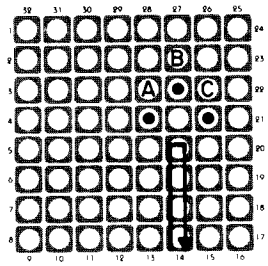
(22) HIT
Seeker says 13.
Hider says HIT.
Seeker places a red marker at 13.



(23) DETOUR
Seeker says 13.
Hider says 6.
Seeker places matching symbols at 13 and 6.



(24) HIT
Seeker says 14.
Hider says HIT.
Seeker places a red marker at 14.



(25) REFLECTION
Seeker says 14.
Hider says REFLECTION.
Seeker places a yellow marker at 14.

Downloaded from www.Manualslib.com manuals search engine

RAY MOVEMENTS/MULTIPLE DETOURS

Sometimes a ray encounters a number of hidden locations on its path. When this happens, the results can be misleading. Look at Figures 26, 27, 28 and 29. **Place balls into the box to match each illustration's hidden locations. Trace each ray's path in the box with your finger.**

PLAYING/AN OUTLINE

You're about to play a practice game. Before you do, look over this outline. It should give you a complete understanding of game play.

1. You and your opponent decide who will hide and who will seek.

2. The two of you then decide whether to play with 4 hidden locations or with 5. A game with 5 hidden locations is usually more difficult.

3. The **hider** marks the hidden locations on the pattern board.

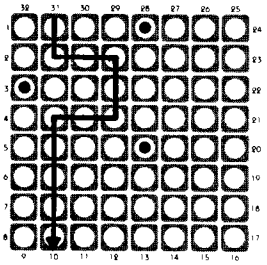
4. The **seeker** then looks for the hidden locations by sending rays into the box:

a) By using the pattern card, your opponent — the **hider** — tells you the result of each ray's travel.

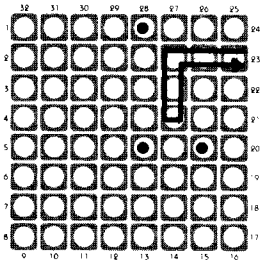
b) You place appropriate marker(s) for each ray.

5. When you — the **seeker** — find a hidden location in the box, mark that point with a ball.

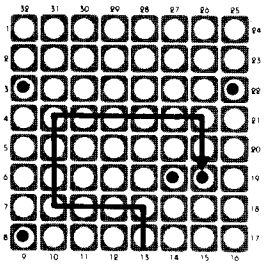
If further clues tell you that you've placed a ball incorrectly, you may move that ball as often as you want.



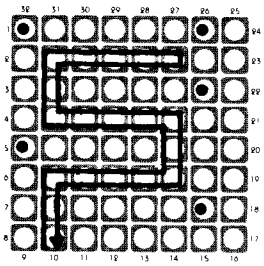
(26) DETOUR
Seeker says 31.
Hider says 10.
Seeker places matching symbols at 31 and 10.



(27) REFLECTION
Seeker says 23.
Hider says REFLECTION.
Seeker places a yellow marker at 23.



(28) HIT
Seeker says 13.
Hider says HIT.
Seeker places a red marker at 13.



(29) REFLECTION
Seeker says 10.
Hider says REFLECTION.
Seeker places a yellow marker at 10.

Downloaded from www.Manualslib.com manuals search engine

6. When you think you've found the exact position of each hidden location, announce that you're finished.

7. Compare your final ball placement with your opponent's pattern card.

SCORING

a) Your **base score** is the total number of ray markers that you've used. Each marker — whether red, yellow or orange — counts as 1 point.

b) 5 points are **added** to your score for each incorrectly placed ball.

c) 5 points are **subtracted** from your score for each time that your opponent — the **hider** — gave you incorrect information. Therefore, if you've placed a ball incorrectly, check your ray markers to see whose fault it was. If an incorrect placement was not your fault, you are not penalized; only the **hider** is.

Example: Let's say that the **hider** said HIT when he or she should have said REFLECTION, and thus caused you to place a ball incorrectly. Let's also say that you used 17 ray markers during the game. In this case your final score would be 17 minus 5, or 12.

WINNING

You and your opponent then reverse roles: the **hider** becomes the **seeker** and the **seeker** becomes the **hider.**

The one to find the other's hidden locations with the lower score is the winner.

Downloaded from www.Manualslib.com manuals search engine

A PRACTICE GAME

To help confirm what you've learned, it's important that you play this game.

First decide who will hide and who will seek. The **hider** should then pick up this booklet and read the next few lines orally.

Hider: In secret, mark the pattern card as shown in **Figure 1, page 2.**

Seeker: Look for the hidden locations in as few tries as possible.

Hider: You may, if it's necessary, consult the following list. It shows each ray's entrance point, travel result and proper marker(s).

Either Player: For information on basic ray patterns and markers, you may consult the illustrations on the booklet's back cover.

Seeker: To start playing, send a ray into the box from any numbered location.

(If you're playing alone, you play the roles of **hider** and **seeker** at the same time. Therefore, do not look at Figure 1 until you've made your final ball placement. To start playing, send a ray into the box from any numbered location. Consult the middle column to learn each ray's travel result. Consult the right-hand column if you have any questions about ray markers. Instructions for Solitaire Play follow this Practice Game.)

SOLITAIRE PLAY

On the following pages are 80 games for single-person play. Each of these games has been developed, tested and refined with the aid of a computer. The pages are divided into two sections: **Look-Up Tables** and **Game Solutions**.

To play:

1. Choose one of the 80 numbered games. Games 1-70 require you to look for 4 hidden locations; the final 10 games present 5 hidden locations each.

2. Select a numbered location for a ray's entrance and turn to the page in the **Look-Up Tables** that shows this number on the top.

3. Look down the page for your game's number. Next to this number you'll see the result of the ray's movement.

4. Place your ray marker(s).

5. Continue to send out rays, and to place markers and balls, until you're satisfied that you've found all of the hidden locations.

6. Check the results of your final ball placements. To do this, find your game's number in the **Game Solutions** section.

In this section you can also check your score. Next to a game's diagram you'll see a NORM reference. The NORM represents the number of ray markers which, as determined by computer, the average player should use to find the hidden locations.

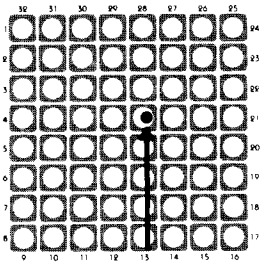
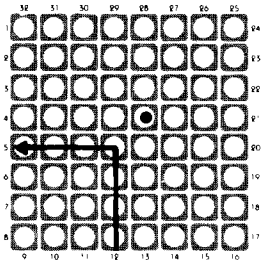
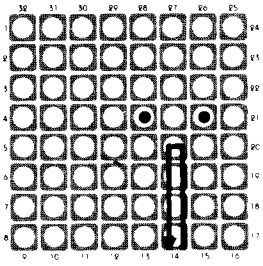
Examples of Basic Ray Movements and Proper Markers



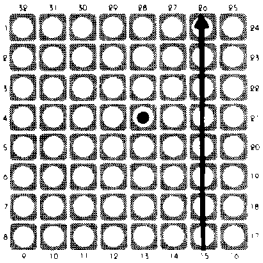
HIT
Seeker says 13
Hider says HIT
Seeker places a red marker at 13.



DETOUR
Seeker says 12
Hider says 5
Seeker places matching symbols at 12 and 5.

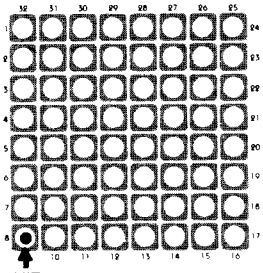


REFLECTION
Seeker says 14
Hider says REFLECTION
Seeker places a yellow marker at 14.

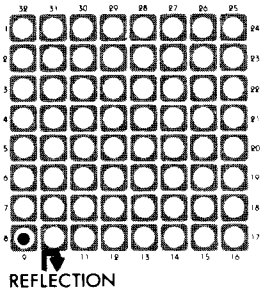


MISS
Seeker says 15
Hider says 26
Seeker places matching symbols at 15 and 26.

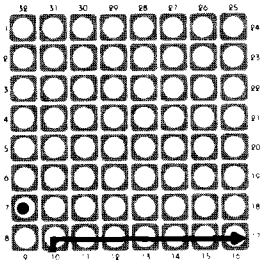
Remember these effects, too.



HIT
Seeker says 9
Hider says HIT
Seeker places a red marker at 9.



REFLECTION
Seeker says 10
Hider says REFLECTION
Seeker places a yellow marker at 10.



DETOUR
Seeker says 10
Hider says 17
Seeker places matching symbols at 10 and 17.
